SUPERVISORS CONCERNED WITH SOLID WASTE PROGRAM IN COUNTY

Cont'd from Page 1

Garbage is to be placed inside these containers and lids closed. items such as mattresses, furniture, wood, tires, junk metal, bedsprings, appliances, and similar items are to be transported to the landfill directly. Also, using these container sites for parking or for anything other than the intended purpose will be considered a trespass and will be charged as such.

Abuses of the solid waste system, including container sites should be reported to the Appomattox County Sheriff's Department at 352-8241.

Your cooperation will be appreciated by the Supervisors and by your neighbors.

SCHOOL BOARD HEARS REPORT ON SPECIAL-VOCATIONAL EDUCATION

Cont'd from Page 1

Impaired class for multi-age students; fulltime services for Speech Handicapped (Contractual Services have been previously provided by Central Virginia Speech and Hearing Center for part-time services).

The initiation of the classes listed above provide service for 1976-77 to 54 EMR students in county schools, and to 20 TMR students, to 75 Speech handicapped students, and to 6 students with impaired hearing Services for the visually handicapped are provided locally and by Virginia Commission for the Visually Handicapped and services for the Emotionally students are provided by Central Virginia Mental Health Clinic. Homebound instruction is provided for one physically handicapped student

Enrollment in vocational education classes for the 1976-77 session, according to Richard B. Carter, Director of Vocational Education, is 477 at the Appomatox Middle School and 990 at the Appomattox County High School. Some students are taking more than one vocational course.

This is an increase over the 1975-76 session in vocational education of 27 at AMS and 49 at ACHS.

In the area of continuing education, Carter reported strong interest in the classes offered during the fall semester Classes in operation and enrollment in each class are as follows: Adult Basic, 12; Art, 9; G.E.D., 8; Radio Operators, 10; Auto Mechanics, 12; Bricklaying, 14; Cake Decorating, 14 beginning; 14 advanced; Checker-Cashier, 10; Sewing-Beginning, 17; Typing, 16; Woodworking, 11; Young Farmers, 22; and Young Homemakers, 14.

Superintendent Lloyd Walton reported Average Daily Member comparison at all county public school at 2849 in September of 1976 as compared to 2832 in September of 1975.

Mr. Donald Armentrout, ACHS Principal, met with the Borad for general discussion regarding the operation of Appomattox County High School. He expressed appreciation to the Board and superintendent for their support. He stated that he was very pleased with the schol program and had high praises for students, teachers and parents. Armentrout empahsized that the primary purpose of the school is to provide effective learning experiences for all students. "This is possible through a balanced program of academic and vocational courses and extra curricular activities", he added.

Members of the Board, Mr. Armentrout and the superintendent joined in a general discussion of various areas related to the high school. Board Chairman, Dr. A. A. Fratrick, expressed to Mr. Armentrout, on behalf of the Board, appreciation for effective administrative leadership he is giving to the high school and pledged the Board's support and cooperation in the achievement of the objectives of the high school program.

In other action, the Board authorized the superintendent to apply for a grant under Title IV, Part C to establish a Career Guidance Program for students in grades 7 through 12.

The Board authorized Superintendent Walton to advertise to receive bids on two used school buses and approved a quotation of $3,264.00 from Falwell Excavating Company, Inc. for repairs to the ACHS parking area.

The Board also received information regarding plans of Latin and Spanish students at Appomattox County High School to go to Rome and Spain respectively during Easter Holidays. The teachers of the classes will assist with coordination, however, all other responsibilities for the trips rest with the parents and students.

The athletic program and events for the 1976-77 session were reviewed and approved by the Board. the superintendent was authorized to proceed with renovatin of a room in the basement area of ACHS to be occupied by T.M.R. students.

November 4 was set as the date for the next meeting of the Appomattox County School Board at 3 P.M. in the Board Room.

Supervisors To Seek Funds

Cont'd from Page 1

the plans in light of jail requirements.

The board is also negotiating for additional land at the proposed jail site, however, Lawson indicated Friday that the jail will be constructed at that site even if the additional land is not acquired. The county has been under pressure from the corrections department to improve its jail facilities. The board was told earlier in the year that we have the second worst jail in the state.

In other action at the meeting, Dr. Lawson told board members the county can expect about $161,000 in additional revenue-sharing funds since it won its suit against the Treasury Department. Dr. Lawson said he did not think the Treasury Department was going to appeal.

Appomattox was one of the 28 counties granted the additional funds by U. S. District Court Judge James C. Turk.

Lloyd G. Walton, school superintendent, told the supervisors the average school enrollment for September was 2849.67 as compared to a projected enrollment of 2850 and to last year's figure of 2832.63.

In other action, the supervisors voted to donate $300.00 to Concord Rescue Squad for its Fund Drive.

TOWN RESIDENTS COULD GET INCREASE IN SEWAGE RATES

Cont'd from Page 1

demands. The proposed plan, which incorporates components of the existing system where possible, includes the following: (1) extension of sewer lines from the existing trickling plant to the site of the proposed treatment facility; (2) a sewage pumping station at the existing lagoon and sewer lines to the present collection system; (3) an aerated lagoon system followed by chemical treatment or land application if treatment standards of 12 mg/l BOD5 and Total Suspended Solids (TSS) are imposed by state and federal agencies, or an aerated lagoon followed by clarification if 30 mg/l BOD 5 and TSS are approved by those agencies. Placement of the proposed treatment facility in the area designated for future development will facilitate expanded service with a minimum of cost in the future.

Cost of construction for the sewage collection system is estimated at $366,945.;; Estimated cost of the secondary treatment facility (30/30 standard) is $585,000.00 for construction and $80,000.00 for land acquisition; and, for the advanced wastewater treatment facility (12/12 standards), $610,000.00 for construction and $40,000.00 for land acquisition. Grant funds from the Environmental Protection Agency have been approved for 75 percent of the above costs. Based on these estimates, the amount for which the Town is eligible is $898,480.00 for secondary treatment and $930,025 for advanced treatment. The sale of revenue bonds seems to be one feasible possibility for meeting the remaining financial obligation. Monthly costs to consumers for operation, maintenance, and capital recovery are estimated at $9.86 for secondary treatment and $15.41 for advanced treatment.

In order to qualify for EPA funding of the treatment plant, the Town must institute a program for correction of the presently excessive infiltration /inflow rate, for which funds are also available. This program should include an indepth survey to determine the source of the problem at an estimated cost of $60,000.00 and rehabilitation of existing sewers estimated at $260,000.00. It is therefore recommended that survey costs be included in the application for Step II funding.

The Engineers will seek approval of the secondary (30/30 standards) treatment facility discussed herein; however, imposition of 12/12 standards by state and federal agencies would require recommendation of the advanced treatment facility. Consideration has been given, also, to Public Law 92:500 which states that, by the year 1985, no pollutants may be discharged into streams. Should this law remain in effect, land application would become the most feasible alternative recommendation.

Spend A Day In Your Attic And Save About $ 150 A Year -
Based On Heating And Cooling Savings On A 1,000 sq. ft. Uninsulated Attic

3½" For Walls 9½¢ sq. ft. — 6" For Ceilings 17¢ sq. ft.

Cut back your fuel bills while you add comfort and do your part to help conserve our dwindling natural resources – buy and install Owens-Corning Fiberglas insulation now for 4-season benefits! Fiberglas dealers outside nurses too; make your home feel larger, more spacious. Roll and batt style Fiberglas is clean and easy to install – lay 6" in your attic, 3½" under floors and walls for year round comfort and fuel savings!

Understanding Your Baby

Baby Food Economy

Now more than ever, some parents of small babies are asking, "Isn't it less expensive to make your own baby food at home?"

This is the "volleyball" question to which many nutrition experts are unable to answer with an absolute "yes" or "no." Nutritionists at Heinz, who are among the most knowledgeable people in the world when it comes to baby food, have observed that availability of food varies from season to season and so do the costs. Energy, time and preparation are cost factors that vary. All in all, there seems to be no significant difference in the costs of home-prepared and commercial baby foods.

So it would seem that for simple time-saving, commercial baby food is the cannier idea.

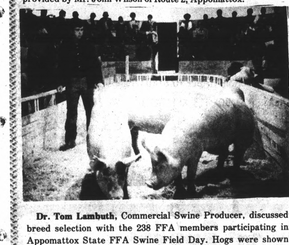
507 Court Street, Appomattox, Va.

Timmy Moore, left, and Danny Carson, right, prepare for castnation demonstration at FFA Swine Field Day.

Fleming Moore and Ronald Harvey demonstrate clipping needle teeth and dipping navel cords on these baby pigs provided by Mr. John Wilson of Route 2, Appomattox.



Dr. Tom Lambuth, Commercial Swine Producer, discussed breed selection with the 238 FFA members participating in Appomattox State FFA Swine Field Day. Hogs were shown and judged in Wilson's Landing's new sales barn.

Local FFA Hosts Statewide Swine Field Day

The Appomattox Senior FFA Chapter, in cooperation with Wilson's Landing Swine Farm, recently hosted a statewide Swine Field Day as part of their agricultural production classes at ACHS.

Over 250 FFA members, advisors and special guests participated in this first annual field day. Fourteen schools from eleven different counties across Virginia were represented. Instructional units were taught by the Appomattox Agricultural Production V students including Danny Carson, Hunter Marshall, Donald Harvey, Ronald Harvey, Donald Stanley, Becky Davidson, Bobby Smith, Timmy Moore, Fleming Moore, Tom Hix and William Purdue.

Demonstrations included castration, ear notching, clipping needle teeth and treating navel cords.

Discussions included Wilson's Record System, Gestation, Economics of Purchasing Good Breeding Stock and Sanitation Procedures.

The Senior FFA members conducted tours of Wilson's Landing's new swine farrowing house and nursery as well as the finishing barns, the three kinds of farrowing facilities.

Special classes were presented by Dr. Tom Lambuth, commercial swine producer from Red House, on selection of breeding stock. There was also a demonstration and discussion on the use of ultra sonic measurement devices for determing pregnancy and back fat.

Mr. Jim Nolen discussed the V.A.M.A. record system used by Mr. Wilson in his swine operation.

FFA's special hosts, John and Martha Wilson, provided an delicious free porkburger lunch for all those attending.

The Field Day, with Danny Carson, Chapter President, as M.C., started at 10:00 a.m. and ended at 2:00 p.m. All FFA members are especially grateful to Mr. and Mrs. John Wilson, owner of Wilson's Landing for their assistance in this educational experience for Ag students in Virginia.

ASCS Today

By: Tom Conrad

APPOMATTOX NOTIFIED OF 1977 ACP ALLOCATION - The Appomattox County ASCS Office has received word that it will be funded $26,023 for the 1977 Agricultural Conservation Program. As in years past, the county committee will identify critical conservatin problems in the County, determine priorities for cost-sharing to obtain the maximum solutions to the problems, and select and develop practices for the county program.

The committee will be meeting on Thursday, October 14, 1976 to work on the program. The results of the meeting will be publicized by newspaper, radio, and newsletter.

ADDITIONAL $3000 for 1976 ACP - Appomattox has received an additional $3000 for the 1976 Agricultural Conservation Program. These funds will be used for conservation needs that were damaged by the drought. If you are interested in applying for cost-sharing under the 1976 program, please come to the ASCS office.

FEED GRAIN DISASTER PAYMENTS- Farmers who have suffered a loss on their corn or grain sorghum crops due to the drought may be eligible for a low yield disaster payment. If you feel that you have a loss you should file your application within 15 days after you complete harvesting it for grain or as soon as you decide that you will abandon the crop.

For corn or grain sorghum that will be abandoned, we will need to make an appraisal to determine the yield per acre. This should be done as soon as possible but before the crop is destroyed.

If you operate more than one farm, production records and records of sales should be kept separate for each farm.

RAILROAD FESTIVAL BOOTH- The ASCS Office will have a booth at the Railroad Festival. Come on by and see us.

"SMOKEY THE BEAR" visited students at Appomattox Primary School recently. Smokey told the children about fire hazards and stressed safety. He asked them to help in every way to prevent fires that can cause much property damage and sometimes personal injuries. It is always a treat for students when Smokey visits them at the various schools in the county.
